

Park West Camera Club Speaker Series: David Atlas “How to be a Photoshop Ninja”

Online References:

YouTube: hundreds, if not thousands, of tutorials on every aspect of Photoshop, not to mention every other activity under the sun.

Lynda.com: a paid software tutorial video site. Not sure of the costs. But well-produced, step-by-step tutorials for all levels. Site covers tons of software. Very easy to follow.

Michelle Wild Studio: mwildsstudio.com. Shameless plug for a friend’s midtown photo studio I rent hourly from time-to-time. Beautiful white space. Strobe lights and triggers, plus some props, apple boxes, all sorts of extras, at reasonable prices. On 29th between 7th and 8th.

Model Mayhem: modelmayhem.com Subscriber-based forum for photographers, models (male and female), makeup artists, retouchers and more. Great resource for all things models. For those who like to shoot live subjects.

The Internet Movie Poster Awards: impawards.com Great visual reference containing every movie poster for the last 20 years. And many earlier ones as well.

Shutterstock.com: Stock photo site. If there’s something you just can’t shoot yourself that you’d like to add to your images, it’s probably here. Textures, backgrounds, etc.

davidatlas.com/photo My personal photography site

davidatlas.com/creative My personal advertising/creative site

Major points from this evening:

Wacom tablet vs. mouse

Bridge/Lightroom/Photoshop RAW options

Alpha masks

Adjustment layers - Curves, Hue/Saturation/Lightness

Layer modes
